

## Installation notes of the CIRO CV template

The package provides the styles and an example of CV written according to the CIRO CV template.

The CIRO CV is in Latex and is based on several additional packages. Among them the ones that must be up-to-date are:

- Biblatex: at least v1.4b 2011/04/12
- Modercv: at least 2010-08-06

In order to check if your Latex system is updated please compile the file `example-cv-ciro.tex`. If latex gives you any error or any style file is missing, please update your Latex installation according to the following guidelines.

If you use Miktex, check the version and the installation of the packages via MikTeX Package Manager.

For MikTeX, please use at least MikTeX 2.8 or 2.9 (problems can be encountered with previous versions of MikTeX).

For Mac/Unix users, use the file **styles.zip** and unzip in your style directory (for Mac users is usually `/usr/local/texlive/texmf-local/tex/latex`).

After that, you have to rebuild the list of the latex styles by the command **texhash** (note that you must be superuser to do that, so, if needed, use the **sudo** command to execute it).

## Bibliography management

Due to some limitations of the `bibtex` tool, some memory issues are frequently reported. These problems are usually related to relatively long bib-files. You can see you have these problems if, by compiling your tex file with `bibtex`, you have warnings as follows

*Warning--I'm ignoring papers-2009-R.'s extra "year" field*

but, checking the entry, no double year field is present.

If you are experiencing such problems, you have to substitute `bibtex` with `bibtex8` with the following command-line options

*`bibtex8 --wolfgang example-cv-ciro`*

## How to fill up your CIRO CV

The example (**example-cv-ciro.tex**) can be used as a starting point for filling up your CV.

Regarding the CV sections and subsections please do not remove (even if empty), change (text and/or order) or add any item.

More instructions are available in the file **example-cv-ciro.tex** as comments(%) inside each CV section.

When completed, put online your CV in your home page and send the corresponding web link to Stefano Giordani ([stefano.giordani@uniroma2.it](mailto:stefano.giordani@uniroma2.it)). Your CV will be added to the following web page (<http://www.disp.uniroma2.it/ciro/curricula.html#>).

For further information, please contact Guido Perboli ([guido.perboli@polito.it](mailto:guido.perboli@polito.it)).
